

ALEJANDRO GIL
ALE LISTENS AND DRAWS

ENGLISH

The workshop will be given by **Alejandro Gil**. He is a visual facilitator, that means that I use visual thinking tools to bring out aspects of a team work or project that might seem “hidden beneath the surface”. He is also a visual storyteller, passionate about creating an emotional connection between what you want to communicate and your audience, using visual media tools.

He explains how by experiencing and practicing visual thinking, he realized that this is one of the most powerful tools that organizations and individuals can use to understand and face challenges that a continuously changing world puts in their way.

His goal is also to make visual thinking tools available for everyone, he, therefore, gives trainings to different audiences and specifically he enjoys working with facilitators, so they can bring forces together to have a “wow!” and “Now I get it!” moment with groups of people.
